

GGI CONFERENCES GMBH

Practice Group Auditing - Summary

The PG Auditing Meeting in Munich will focus on some of the ideas already discussed in previous meetings. One issue is to implement an internal GGI process to ensure, that independency requirements are met on a worldwide basis. Furthermore the standardization of our audit approach shall be discussed. The meeting will be supported by guests from DATEV eG, which is one of the leading software houses and IT service providers for tax consultants, auditors and lawyers in Germany. DATEV eG offers a web-based software-tool for an "Independency Check" as well as an multilingual audit software that considers all requirements of the International Standards on Auditing (ISA). The presentation by our guests from DATEV eG and their ideas based on experiences with other co-operations similar to GGI, should be used as a starting-point for an open discussion concerning the next steps to be taken by the PG.

Meeting Agenda
