Saturday's Sightseeing Tours

Tulum Ruins: One of the Mayan world's most visited sites is an ancient fortress that sits atop cliffs and offers a breath-taking view overlooking the Caribbean. It is the largest Mayan City built on the coast and it is just 80 miles southwest of Cancun. Among the structures in Tulum, "El Castillo" (The castle) is the most imposing large stone structure located on the cliff, actually a temple as well as a fortress, was once covered with stucco, just as several un-restored palace-like buildings settled around it.

Water Jungle Safari: Admire the beauty of the Caribbean Sea while you drive your own speedboat. This exciting adventure starts at the Nichupté Lagoon, going through a series of channels where you will have the opportunity to explore the mangrove areas of the lagoon. Then you will come up to the open sea (full speed time!) until you arrive to the coral reef area, the second largest reef barrier in the world, full of coral and multicolour fish. It is now the time to get in the water and take part in the snorkelling tour.

Swim with Dolphins: Swimming with the dolphins, an experience of a lifetime! Live this wonderful adventure in Cancun and discover the magic of dolphins in a controlled environment. Cancun, Isla Mujeres & the Mayan Riviera offer a wide array of options for you to enjoy this unforgettable experience.

Sunday's Tour to Chichen Itza

Chichen Itza is not the only one Mayan Archeological Sites in the Cancun area but it is one of the most impressive ones and it is now considered one of the New Seven Wonders of the World, definitely a place to see. Chichen Itza

Chichen Itza is one of the most impressive Archeological Sites in the Cancun area

was a major focal point in the northern Maya lowlands from the Late Classic (c. AD 600–900) through the Terminal Classic (c. AD 800–900) and into the early portion of the Early Postclassic period (c. AD 900–1200). The site exhibits a multitude of architectural styles, reminiscent of styles seen in central Mexico and of the Puuc and Chenes styles of the northern Maya lowlands.

The presence of central Mexican styles was once thought to have been representative of direct migration or even conquest from central Mexico, but most contemporary interpretations view the presence of these non-Maya styles more as the result of cultural diffusion.
